

Лабораторна робота №1

Тема. Керування вимогами та планування розробки.

Мета. Навчитися збирати, аналізувати, валідувати, документувати та погоджувати вимоги до ПЗ; створювати SRS; сформувати Product Backlog і базовий процес виконання (Kanban/Scrum).

Керування підписками — агрегація платежів, нагадування, авто-скасування.

ЗАВДАННЯ

ЗАВДАННЯ 1. Discovery Phase

- сформулювати бачення продукту: цілі бізнесу, межі (**scope/out of scope**), припущення;
- визначити всіх **stakeholders**;
- обрати та обґрунтувати методи елєситації (інтерв'ю, воркшоп, опитування, спостереження, аналіз документів, прототипування, jad тощо);
- скласти список первинних вимог.

ЗАВДАННЯ 2. Аналіз і декомпозиція вимог

- класифікувати вимоги;
- нормалізувати вимоги: усунення дублів, атомарність, трасованість, узгодженість термінів (за потреби);
- декомпонувати вимоги **Epic → Feature → User Story**;
- **User Story** у форматі: *as a [persona] i want [goal] so that [value]*;
- скласти каталог вимог з атрибутами;
- для функціональних вимог створіть **Use Case Diagram**.

ЗАВДАННЯ 3. Валідація та верифікація (V&V)

- перевірити вимоги за критеріями: повнота, коректність, узгодженість, однозначність, здійсненність, необхідність, тестованість, трасованість;
- для кожної **User Story** сформувати **Acceptance Criteria**.

ЗАВДАННЯ 4. Approval і документація

4.1 Модель SCRUM-команди + RACI-matrix

Для визначених вимог створіть команду для розробки ПП.

					ЛР.ОК24.ПІ231.03.01			
Змін.	Аркуш	№ докум.	Підпис	Дата				
Розроб.		Башук О. Ю.			Керування вимогами та планування розробки	Лім.	Арк.	Акрушів
Перевір.		Жереб Д. В.				Н	1	30
						ХПК		
Н. Контр.								
Затверд.								

4.2 Product Backlog

- створити **Product Backlog** на основі вимог, які були визначенні в попередніх пунктах;
- таблиця (рекомендовано): *id, title, user story, priority (moscow), value (1–5), effort (sp), ac i то*.

4.3 Kanban-дошка для Product Backlog

Колонки (рекомендовано): *Backlog → Ready → In Progress → Review → Testing → Done*.

4.4 Планування спринтів і дошки

- оберіть довжину спринту (напр., 2 тижні);
- сплануйте мінімум 3 спринти: визначіть **Sprint Goal**, оберіть необхідні **User Story** з **Product Backlog**;
- для кожного спринту створіть окрему **Kanban-Дошку**;
- створити діаграму **Gannt**.

4.5 Software Requirements Specification (SRS)

На основі всіх вище пройдених завдань створіть **SRS** за зразком. Рекомендовано використовувати **Confluence**:

ЗАВДАННЯ 5. Оформити звіт та продемонструвати викладачу.

Хід роботи:

Завдання 1. Discovery Phase

1.1 Виявлення цілей. Із завдання можна визначити такі основні цілі:

1. Створити єдину платформу для додавання, зберігання, видалення підписок, завдяки цьому зменшити грошові врати від забутих підписок.
2. Агрегувати платежі для зручного перегляду користувачами інформації про витрати.
3. Атоматизувати нагадування та видалення підписок для ще більшої зручності використання програми.

Межі. Враховуючи цілі бізнесу було виділено такі межі:

Scope:

1. Registration and login,
2. User profile management,
3. Manually adding and editing subscriptions,
4. Cost aggregation,
5. Subscription payment reminder,
6. Automatic and manual deletion of subscriptions,

					ЛР.ОК24.ПІ231.03.01	Арк.
						2
Змін.	Арк.	№ докум.	Підпис	Дата		

7. Clear and intuitive interface,
8. Support for different languages and currencies,
9. Integration with subscription cancellation services.

Out of Scope:

1. Payment through the program,
2. Integration with banks,
3. Grouping subscriptions with other users.

Припущення. Виходячи із цілей та меж, сформовано припущення:

1. Користувачі готові надати свої електронні адреси та дані із сервісів.
2. Сервіси із підписками мають відкриті API або можуть надати доступ для скасування підписок.
3. Користувачі мають потребу в такому застосунку, коли в них є принаймі декілька підписок.

1.2 Визначення stakeholders. Стейкхолдерами данного продукту є:

1. End users - для них і розробляється ця програма, вони мають високий вплив та на їхніх відгуках і робиться кінцевий продукт.
2. Developers – реалізують поставлені завдання.
3. Investors – фінансують розробку, тестування, рекламу та все, що потребує певного капіталу.
4. Project manager – забезпечує ефективність роботи команди, визначає терміни, бюджет та ресурс.
5. Product owner – контролює продукт та його успішність на ринку.
6. Support service – взаємодіють із користувачами для виявлення проблем та надання підтримки.
7. QA – виконують тестування продукту.
8. Marketing – забезпечують донесення інформації про продукт.

1.3 Методи елісітації. Було вибрано наступні методи елісітації:

1. Serveys - вибрано з метою виявлення проблеми з яким зустрічаються користувачі підписок, зрозуміти, що найбільше

					ЛР.ОК24.ПІ231.03.01	Арк.
						3
Змін.	Арк.	№ докум.	Підпис	Дата		

дратує, чого б вони бажали та чого не вистачає, визначити найважливіші функції.

2. Market and competitor research – вибрано з метою того, щоб зрозуміти, що вже запропоновано іншими сервісами, виявлення потенційних конкурентів та визначення альтернатив та відповідей на їхні реалізації.
3. Prototyping – створення інтерактивних макетів для реалізації головних функцій, щоб отримати ранній фідбек та покращити проблемні елементи.
4. JAD – вибраний з причини того, що усі ключові елементи збираються на короткій сесії для уточнення та визначення остаточних вимог та цілей.

1.4 Список первинних вимог. Використовуючи методи елісітації та цілі, сформовано наступний список початкових вимог:

1. The application must be in the AppStore and PlayMarket,
2. The system must run on IOS 18 and Android 15,
3. The user interface should be adapted to different screen sizes,
4. Using PostgeSQL 17,
5. Backend – Node.js 20 LTC with NestJS 11.x,
6. Frontend – React.js 18.x with TypeScript 5.9.x,
7. The system is developed on a microservice architecture,
8. The system must have automated unit tests, integrated and end to end tests,
9. Reduce money lost from forgotten subscriptions,
10. Concentration of subscriptions in one place,
11. Give control over subscriptions,
12. Main menu loading time is less than 3 seconds,
13. The system must be available 99% of the time,
14. Intuitive interface,
15. Availability of foreign language and , currencies.

					ЛР.ОК24.ПІ231.03.01	Арк.
						4
Змін.	Арк.	№ докум.	Підпис	Дата		

16. Integration with services (Netflix, Amazon, YouTube, ect.),
17. Fast integration process with services,
18. Maintaining performance for large subscriptions,
19. The program has the advantage of being easy to maintain and support,
20. Performing actions in a few clicks,
21. Registration by email,
22. Login to the system using social networks,
23. Adding a subscription manually,
24. Adding a subscription using integration with services,
25. Editing and deleting existing subscriptions,
26. Automatic deletion for integrated subscriptions,
27. Widget showing total expenses for the month/year,
28. Push notification about the need for payment,
29. Setting the notification period,
30. View payment history for your current subscription,
31. Subscription categorization,
32. Subscribe sorting and filtering.

Завдання 2. Аналіз і декомпозиція вимог.

2.1 Класифікація вимог.

Функціональні вимоги. Цей перелік вимог віднесено до функціональних тому, що вони показують, що саме повинна робити програма, які функції вона має надати у використання, сюди відносяться:

1. Registration by email
2. Login to the system using social networks,
3. Adding a subscription manually,
4. Adding a subscription using integration with services,
5. Editing and deleting existing subscriptions,
6. Automatic deletion for integrated subscriptions,
7. Widget showing total expenses for the month/year,

					ЛР.ОК24.ПІ231.03.01	Арк.
						5
Змін.	Арк.	№ докум.	Підпис	Дата		

8. Push notification about the need for payment,
9. Setting the notification period,
10. View payment history for your current subscription,
11. Subscription categorization.
12. Subscribe sorting and filtering

Нефункціональні вимоги. Цей перелік вимог віднесено до нефункціональних тому, що вони описують як саме система повинна працювати та що надавати сюди відносяться:

1. Main menu loading time is less than 3 seconds,
2. The system must be available 99% of the time,
3. Intuitive interface,
4. Availability of foreign language,
5. Integration with services (Netflix, Amazon, YouTube, ect.),
6. Fast integration process with services,
7. Maintaining performance for large subscriptions.
8. The program has the advantage of being easy to maintain and support.,
9. Performing actions in a few clicks,

Технічні вимоги. Цей перелік вимог віднесено до технічних тому, що вони визначають середовище та технічні умови у яких повинна працювати система, що сюди відносяться:

1. The application must be in the AppStore and PlayMarket,
2. The system must run on IOS 18 and Android 15,
3. The user interface should be adapted to different screen sizes,
4. Using PostgreSQL 17,
5. Backend – Node.js 20 LTC with NestJS 11.x,
6. Frontend – React.js 18.x with TypeScript 5.9.x,
7. The system is developed on a microservice architecture,
8. The system must have automated unit tests, integrated and end to end tests,

					ЛР.ОК24.ПІ231.03.01	Арк.
						6
Змін.	Арк.	№ докум.	Підпис	Дата		

Бізнес вимоги. Цей перелік вимог віднесено до бізнес вимог тому, що вони показують що саме повинна надати програма та для чого вона взагалі, сюди відносяться:

1. Reduce money lost due to forgotten subscriptions,
2. Concentration of subscriptions in one place,
3. Give control over subscriptions,

2.2 Декомпозиція вимог

Згідно вимог можна виділити наступні epic – feature – user story:

Epic 1. Account Management:

Feature 1.1. User Authentication:

US1 - As a new user, I want to sign up with an email and password so that I can create a secure personal account.

US2 - As an existing user, I want to log in with my email and password so that I can access my data.

US3 - As a registered user, I want to log in using social networks so that it's faster.

Feature 1.2. Profile Management:

US4 - As a user, I want to be able to change my password so that I can keep my account secure

US5 - As a user, I want to be able to turn off notifications so that they don't interfere.

Epic 2. Subscription Management:

Feature 2.1. Manual Addition and Tracking:

US6 - As a user, I want to manually add a new subscription so that I can begin tracking its cost and payment dates.

US7 - As a user, I want to see a list of all my subscriptions on one screen so that I can have a complete overview of my recurring expenses.

US8 - As a user, I want to be able to edit my subscription details, so that I can change something.

					ЛР.ОК24.ПІ231.03.01	Арк.
						7
Змін.	Арк.	№ докум.	Підпис	Дата		

US9 - As a user, I want to manual delete a subscription so that it no longer appears in my active expenses and financial forecasts after I've canceled it.

Feature 2.2. Categorization and Search:

US10 - As a user, I want to assign a category to my subscriptions so that I can better organize them.

US11 - As user, I want to be able to search for a subscription by name so that I can quickly find.

Feature 2.3 Sorting and filtering:

US12 - As a user, I want to be able to filter subscriptions by category so that saves time.

US13 - As a user, I want to be able to sort subscriptions by specified parameters so that I can show the information I need.

Epic 3: Financial Analytics:

Feature 3.1. Expense Visualization:

US14 - As a user, I want to see a widget that displays my monthly expenses so that I can monitor my spending.

US15 - As a user, I want to see a widget that displays my yearly expenses so that I can monitor my spending.

Feature 3.2. Charts and graphs:

US16 - As a user, I want to see a pie chart of monthly expenses so that I can better understand.

US17 - As a user, I want to see the payment calendar so that it is a convenient way to submit information.

Feature 3.3. Payment History:

US18 - As a user, I want to be able to view my subscription history so that I can track my subscription costs.

US19 - As a user, I want to receive a statement of expenses to my email address so that I can show others.

Epic 4. Notifications and Reminders:

					ЛР.ОК24.ПІ231.03.01	Арк.
						8
Змін.	Арк.	№ докум.	Підпис	Дата		

Feature 4.1. Reminders:

US20 - As a user, I want to set a reminder period so that helps to keep track of time.

US21 - As a user, I want to receive payment notifications so that I don't forget about my subscriptions.

US22 - As a user, I want to be able to choose which services I receive notifications from so that I don't miss any messages.

Epic 5. Automation and integration:

Feature 5.1. Automatic cancellation of subscriptions:

US23 - As a user, I want to set the subscription to auto-unsubscribe so that I no longer need it.

US24 - As a user, I want to add a subscription using integration with services so that it is faster.

2.3 Каталог вимог із атрибутами.

Виходячи із наявних вимог, можна скласти таку таблицю вимог із атрибутами (таблиця 1):

Таблиця 1 – Вимоги із атрибутами

Epic	Feature	User story	Priority	Value	Effort SP
Epic 1. Account Management	Feature 1.1. User Authentication:	US1 Email SignUp	Must have	5	3
		US2 Email LogIn	Must have	5	2
		US3 SN LogIn	Should have	4	3
	Feature 1.2. Profile Management:	US4 Pasword change	Must have	5	2
		US5 Disable notification	Could have	3	1

Epic 2: Subscription Management	Feature 2.1: Manual Addition and Tracking	US6 Manual subscription adding	Must have	5	3
		US7 View Subscription List	Must have	5	4
		US8 Edit Subscription	Must have	5	3
		US9 Manual Subscription deleting	Must have	5	2
	Feature 2.2: Categorization and Search	US10 Subscription catagorization	Should have	4	2
		US11 Subscription search	Should have	3	2
		US12 Filtering	Could have	3	2
		US13 Sort subscription	Could have	3	1
Epic 3: Financial Analytics	Feature 3.1: Expense Visualization	US14 Monthly expense widget	Must have	4	2
		US15 Yearly expense widget	Must have	4	2
	Feature 3.2: Charts and graphs	US16 Expance chart	Should have	4	3
		US17 Paymant calendar	Should have	3	4

	Feature 3.3. Payment History	US18 Payment history	Must have	4	3
		US19 Export report to email	Could have	3	5
Epic 4. Notifications and Reminders	Feature 4.1. Reminders	US20 Set reminder period	Must have	5	2
		US21 Receive payment notification	Must have	5	4
		US22 Choose notification service	Won't have	3	5
Epic 5. Automation and integration	Feature 5.1	US23 Automatic subscription cancellation	Must have	5	8
		US24 Add subscription via integration	Should have	4	13

2.4 Use case diagram.

Створено use case diagram, яка сформована з функціональних вимог, в цій діаграмі використано чотири основні актори, серед яких три сервіси (Рисунок 1).

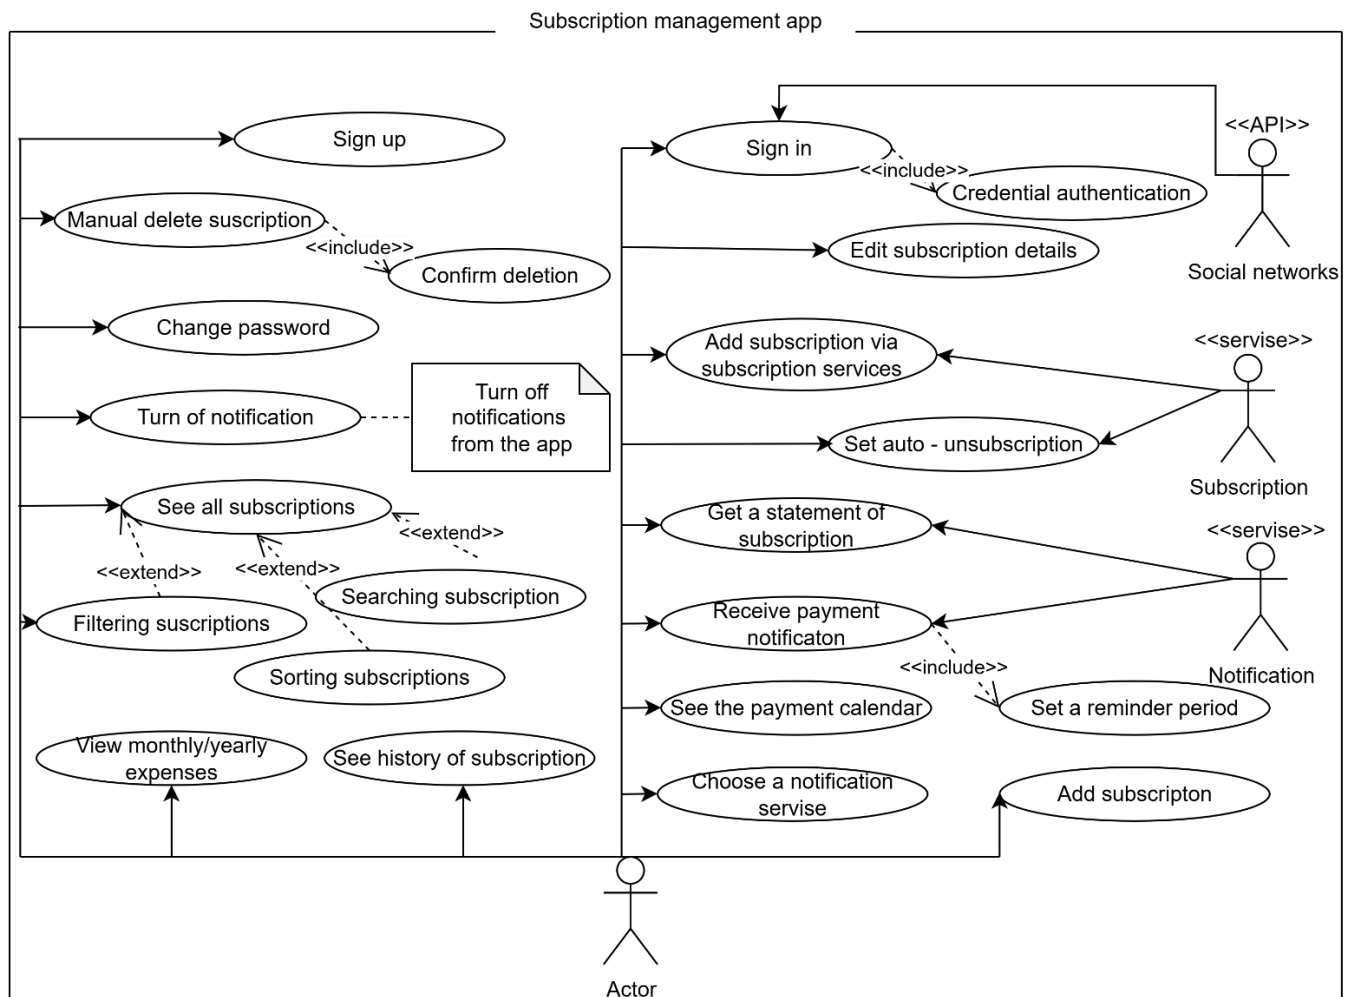

Рисунок 1 – Use Case Diagram

Завдання 3. Валідація та верифікація (V&V)

3.1 Перевірити вимоги. Всі вимоги є чіткими та однозначними, повними, узгодженими з іншими вимогами та тестованими.

3.2 Acceptance Criteria. До кожного US створено AC, які визначають, що саме має бути реалізовано та як це має працювати:

US1 - As a new user, I want to sign up with an email and password so that I can create a secure personal account.

AC1 - Given I am on the registration page, when I enter a valid email address and a password that meets the security requirements, then my account is successfully created.

AC2 - Given I try to register with an email address that already exists in the system, when I submit the form, then I see an error message "This email is already in use," and the account is not created.

AC3 - Given I enter a password that does not meet the complexity criteria, when I submit the form, then I see a validation error and the account is not created.

US2 - As an existing user, I want to log in with my email and password so that I can access my data.

AC1 - Given I am a registered user on the login page, when I enter the correct email address and password, then I am successfully authenticated.

AC2 - Given I am on the login page, when I enter an incorrect email or password, then I see an error message "Invalid credentials".

US3 - As a registered user, I want to log in using social networks so that it's faster.

AC1 - Given I am on the login page and social login is available, when I successfully authenticate through that network, then I am logged into the app.

AC2 - Given I am a new user, when I log in via a social network for the first time, then an account is automatically created for me using data from the social network.

AC3 - Given I attempt to log in via a social network, when the authentication with the third-party service fails, then I have an error message.

US4 - As a user, I want to be able to change my password so that I can keep my account secure.

AC1 - Given I am in account settings and chose to change password, when I entered the old password correctly and the new one twice then the password is changed.

AC2 - Given I am trying to change my password, when I enter an incorrect current password, then I see an error message, and the password is not changed.

					ЛР.ОК24.ПІ231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		13

AC3 - Given I am trying to change my password, when the new password and its confirmation do not match, then I see a error, and the password is not changed.

US5 - As a user, I want to be able to turn off notifications so that they don't interfere.

AC1 - Given I am in the notification settings section, when I turn off the notifications, I no longer receive push notifications.

US6 - As a user, I want to manually add a new subscription so that I can begin tracking its cost and payment dates.

AC1 - Given I am on the "Add New Subscription", when I fill in all required fields and save, then the new subscription appears in my main list.

AC2 - Given I am trying to save a new subscription, when I have not filled in a mandatory field, then I see error next to that field, and the subscription is not created.

US7 - As a user, I want to see a list of all my subscriptions on one screen so that I can have a complete overview of my recurring expenses.

AC1 - Given I have added one or more subscriptions, when I open the main screen, then I see a list of all my active subscriptions.

AC2 - Given I haven't added any subscriptions yet, when I'm on the main screen, I see the message "No active subscriptions"

US8 - As a user, I want to be able to edit my subscription details, so that I can change something.

AC1 - Given I am viewing the details of an existing subscription, when I make changes to the fields and save, then the subscription information is updated.

AC2 - Given I am editing a subscription, when I enter invalid, then I see a error, and the changes are not saved.

US9 - As a user, I want to manual delete a subscription so that it no longer appears in my active expenses and financial forecasts after I've canceled it.

					ЛР.ОК24.ПІ231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		14

AC1 - Given I am viewing my list of subscriptions, when I select the delete option for a specific subscription and confirm the action, then that subscription is removed from the apps.

US10 - As a user, I want to assign a category to my subscriptions so that I can better organize them.

AC1 - Given I am adding or editing a subscription, when I select a category from the list, then the category is saved with the subscription.

US11 - As user, I want to be able to search for a subscription by name so that I can quickly find.

AC1 - Given I am on the subscription list screen, when I type subscription's name into the search field, then the list show only subscriptions that match the query.

AC2 - Given Search is open, when a non-existent subscription is entered, the message "No such element found" is displayed.

US12 - As a user, I want to be able to filter subscriptions by category so that saves time.

AC1 - Given I have subscriptions in different categories, when I apply a filter for some the category, then only subscriptions assigned to this category are displayed in the list.

AC2 - Given I have subscriptions in different categories, when a category is selected that has no subscriptions then message "No such element found" is displayed.

US13 - As a user, I want to be able to sort subscriptions by specified parameters so that I can show the information I need.

AC1 - Given I have subscriptions when I choose a sort criterion and order then my subscriptions are sorted by the specified conditions

US14 - As a user, I want to see a widget that displays my monthly expenses so that I can monitor my spending.

					ЛР.ОК24.ІІ231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		15

AC1 - Given I have active subscriptions, when I open the analytics screen, then I see a widget displaying the total subscription expenses for the current month.

AC2 - Given I have no subscriptions and never had any, when I open the analytics screen, then I see widget with empty values.

AC3 - Given I don't have any active subscriptions but there were during this period, when I open the analytics screen, I see widgets with the values of past subscriptions.

US15 - As a user, I want to see a widget that displays my yearly expenses so that I can monitor my spending.

AC1 - Given I have active subscriptions, when I open the analytics screen, then I see a widget displaying the total subscription expenses for the current year.

AC2 - Given I have no subscriptions and never had any, when I open the analytics screen, then I see widget with empty values.

AC3 - Given I don't have any active subscriptions but there were during this period, when I open the analytics screen, I see widgets with the values of past subscriptions.

US16 - As a user, I want to see a pie chart of monthly expenses so that I can better understand.

AC1 - Given I have subscriptions assigned to categories, when I view the analytics screen, then I see a pie chart visualizing the breakdown of my monthly expenses by category.

AC2 - Given I have no information about subscriptions for this month ,when I open the analysis screen, then I see a blank chart

US17 - As a user, I want to see the payment calendar so that it is a convenient.

AC1 - Given I have scheduled subscription payments, when I open the payment calendar, then I see the dates on which payments are scheduled marked on the calendar.

AC2 - Given I am on the payment calendar, when I tap on a marked date, then I see a list of subscriptions due for payment on that day.

					ЛР.ОК24.ІІ231.03.01	Арк.
						16
Змін.	Арк.	№ докум.	Підпис	Дата		

AC3 - Given I have no scheduled payments, when I open the payment calendar, then it is empty.

US18 - As a user, I want to be able to view my subscription history so that I can track my subscription costs.

AC1 - Given I have a subscription with past payments, when I open the details of this subscription, then I see a "Payment History" list of past payments.

US19 - As a user, I want to receive a statement of expenses to my email address so that I can show others.

AC1 - Given I am on the analytics screen, when I select the "Export monthly report" option and, then I receive an email with a file containing the expense report.

US20 - As a user, I want to set a reminder period to keep track of time.

AC1 - Given the reminders tab is open and reminders are enabled, when a period is selected from the list and confirmed, then the setting is applied.

US21 - As a user, I want to receive payment notifications so I don't forget about my subscriptions.

AC1 - Given a reminder period set, when the time comes then a notification comes.

AC2 - Given no reminder period set, when the subscription is about to end, then the notification does not arrive.

US22 - As a user, I want to be able to choose which services I receive notifications from so that I don't miss any messages.

AC1 - Given the reminder tab is open, when a service for sending messages is selected and saved, then a message will arrive using this service

US23 - As a user, I want to set the subscription to auto-unsubscribe so that I no longer need it.

AC1 - Given the card is integrated with the service, when the automatic subscription cancellation option is selected, then the subscription will be canceled at the end of the subscription period.

					ЛР.ОК24.ПІ231.03.01	Арк.
						17
Змін.	Арк.	№ докум.	Підпис	Дата		

AC2 - Given the card is not integrated with the service, when a subscription is opened then there is no automatic cancellation option

US24 - As a user, I want to add a subscription using integration with services so that it is faster.

AC1 - Given I have connected my account , when I initiate a subscription scan, then the app finds my active subscriptions from that service and suggests adding them to my list.

AC2 - Given a subscription was found automatically, when I confirm adding it, then it appears in my list with its pre-filled.

Завдання 4. Approval і документація

4.1 Модель SCRUM-команди + RACI-matrix.

Виходячи із списку стейкхолдерів можна сформувати таку SCRUM - команду: PO (1 особа) – Project owner, який визначає вимоги до продукту та його пріоритети, PM (1 особа) – Project manager – керує процесами, строками задачі та ресурсами під проект, Developers (7 осіб) – команда розробників, яка складається з Backend (2 особи) – керують серверною логікою та базами даних, Dev.(2 особи) - виконують загальну розробку, Frontend (2 особи) – відповідальний за загальний вигляд програми, QA Engineer (1 особа) – відповідальний за автоматизоване та ручне тестування. Всі вони об'єднані для надання користувачеві готового застосунку, тому звідси можна виділити таку RACI matrix (Таблиця 2):

Легенда:

R – Responsible, A – Accountable, C – Consulted, I – Informed.

Таблиця 2 RACI matrix

Feature / Action	Product Owner (PO)	Project Manager (PM)	Development Team (Dev Team)	QA Engineer
Registration and Authentication	C	A	R	R
Profile Management	C	A	R	R
Manual adding/editing	I	A	R	R
Integration and auto-adding	C	A	R	R
Categorization and filtering	I	A	R	R

Automatic cancellation	C	A	R	R
Expense tracking	C	A	R	R
Viewing payment history	I	A	R	R
Exporting reports	C	A	R	R
Notification settings	C	A	R	R
Receiving reminders	C	A	R	R
Feature requirements definition	R	A	C	C
Deployment and releases	R	R	R	R
Testing and quality assurance	I	A	R	R
Feedback collection and analysis	R	R	C	I

4.2 Product Backlog. На основі попередніх вимог, user story до них та acceptance criteria можна створити наступний prodycut backlog:

Team Space / Product backlog

4.3 Kanban-дошка для Product Backlog.

Згідно із наведеним Product Backlog було створено цю дошку:

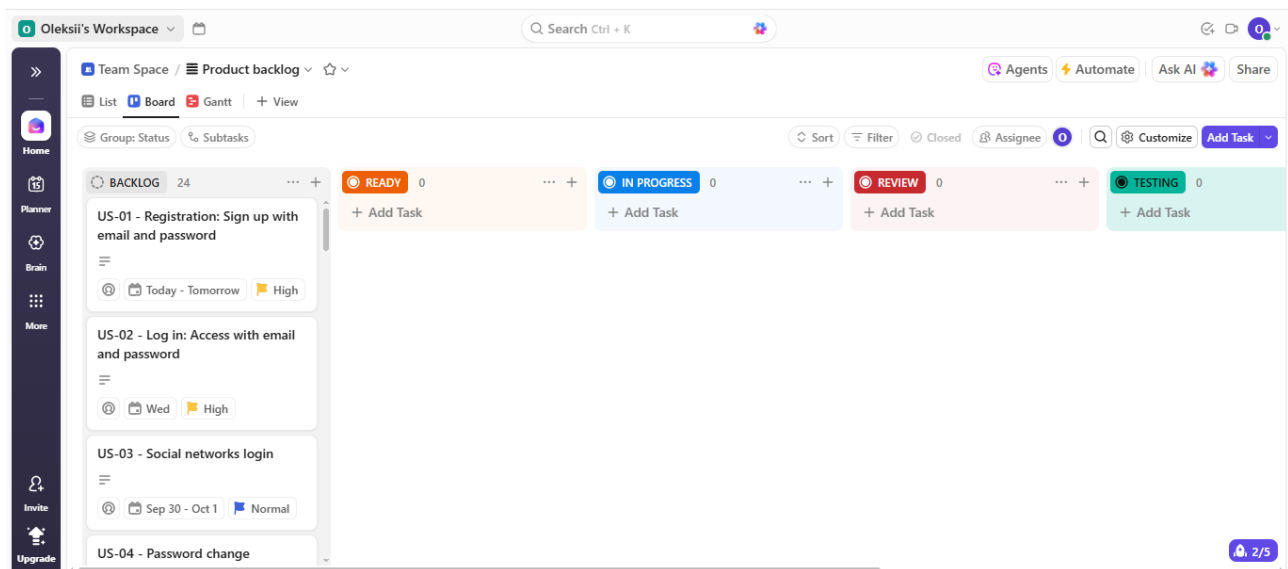

Рисунок 5 – Перша частина дошки

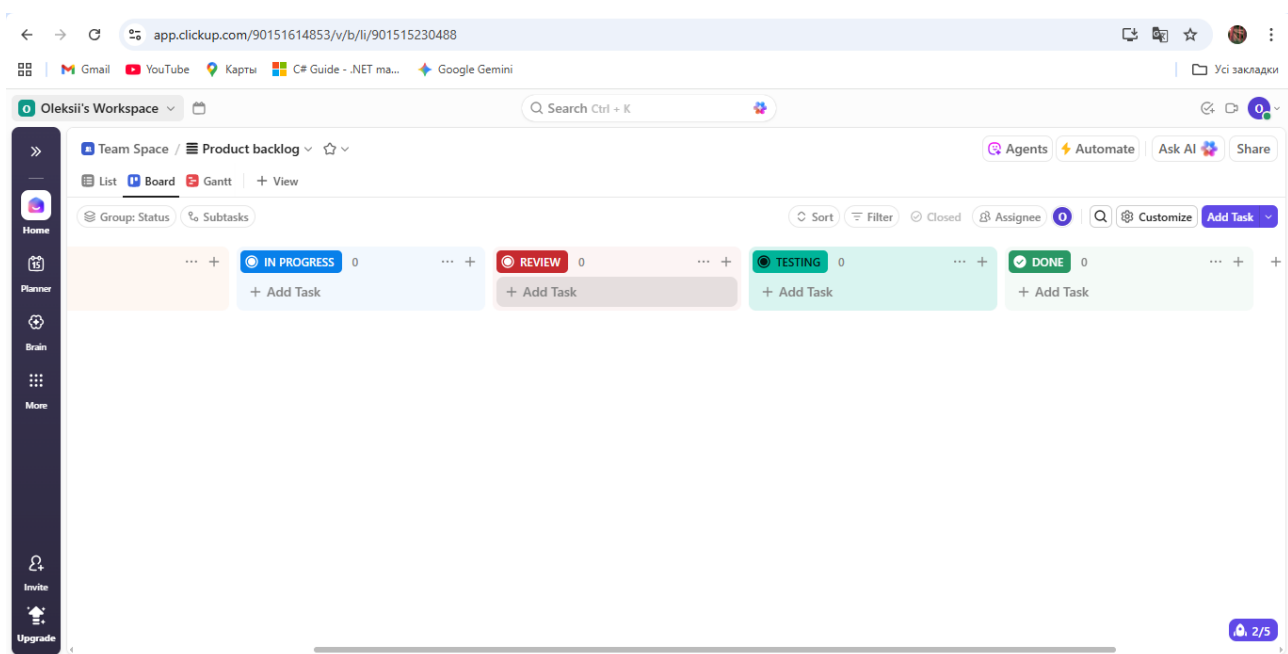

Рисунок 6 – Друга частина дошки

4.4 Планування спринтів і дошки. Виходячи із наведеного backlog можна виділити чотири основні спринти:

Sprint 1 Plan (12 days)

Sprint Goal

Основні функції та взагалі функціонування, він закладає базове функціонування програми: реєстрація, вхід, створення, видалення та перегляд підписок.

Scope (User Stories in Sprint 1)

					ЛР.ОК24.ПІ231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		21

- **US - 01:** Email SignUp
- **US - 02:** Email LogIn
- **US - 04:** Password change
- **US - 06:** Manual subscription adding
- **US - 07:** View subscriptions list
- **US - 08:** Edit subscriptions
- **US - 09:** Manual subscription deleting

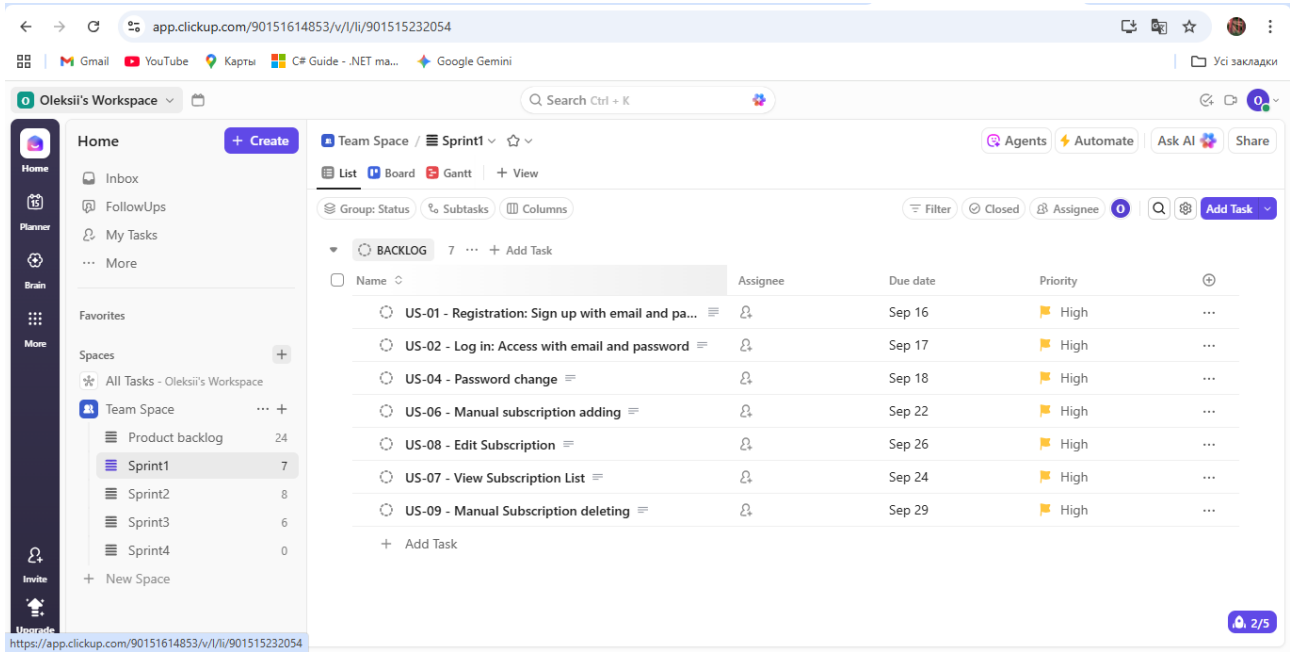

Рисунок 7 – Sprint backlog

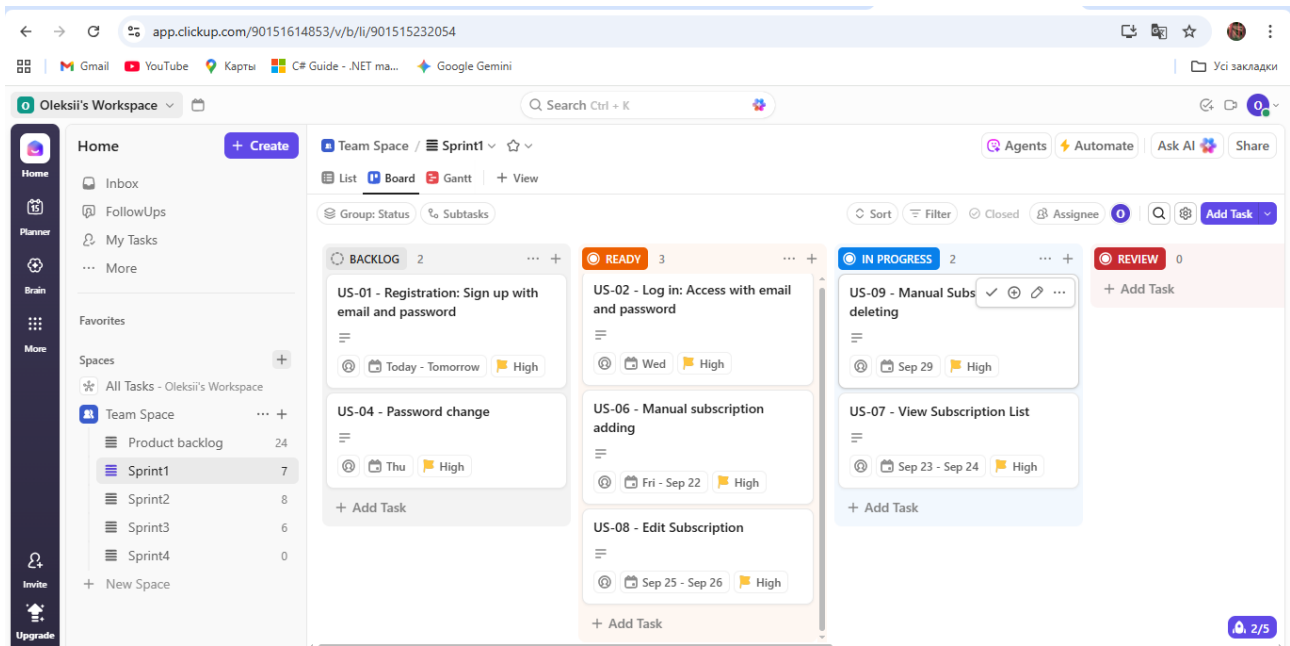

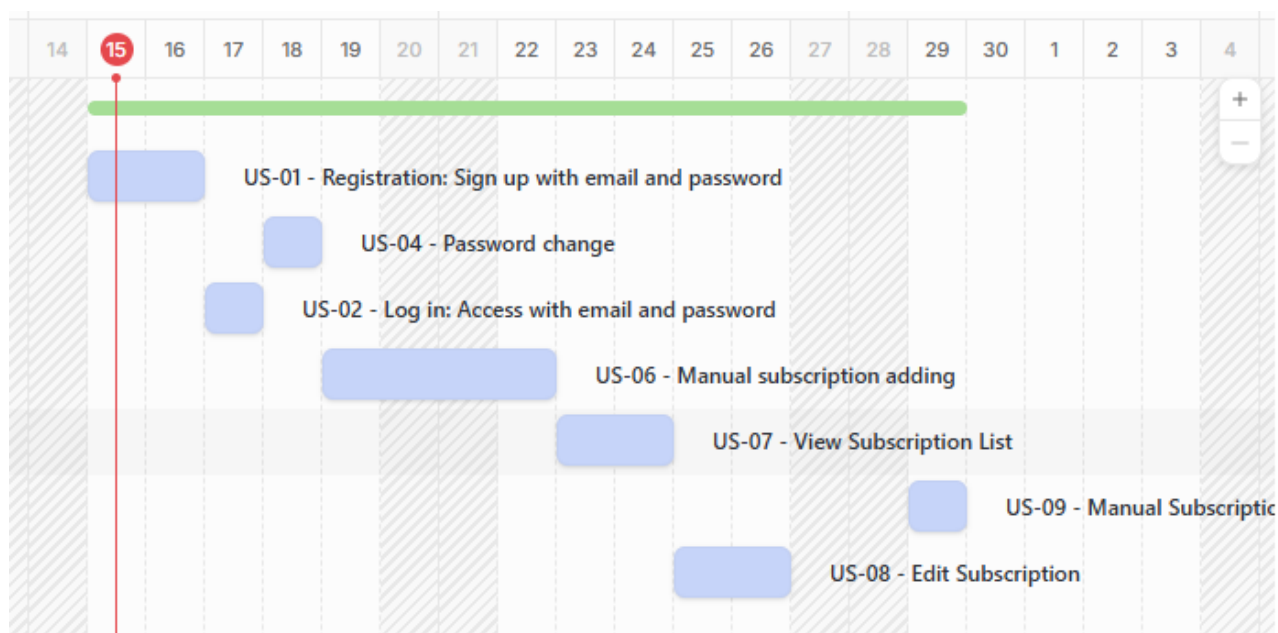

Рисунок 8 – Дошка

- **Day 1 (15.09):** Sprint Planning, початок розробки ключових завдань: реєстрація (US - 01).
- **Day 2 – 4 (16.09 - 18.09):** Daily Meetings, завершення реєстрації, реалізація входу в систему (US - 02) та зміни пароля (US - 04).
- **Day 5 – 9 (19.09 - 24.09):** Daily Meetings, розробка основних функцій: додавання нової підписки (US-06) та перегляд списку підписок (US - 07).
- **Day 10 – 11 (25.09 - 26.09):** Daily Meetings, завершення можливостей редагування (US - 08) та видалення (US - 09) підписок, проведення тестування та підготовка до демонстрації.
- **End of Day 12 (29.09):** Sprint Review and Retrospective.

Sprint 2 Plan (13 days)

Покращення основних функцій, розширення системи, аналітика, в цьому спринті додано функціональності, що роблять додаток зручнішим.

- **US - 03:** SN LogIn
- **US - 10:** Subscription categorization

Subscriptions management app SRS

Target release	v1.0.0 (MVP Realese)
Date	14 Sep 2025
Document status	REVIEW
Document owner	Business Analyst / Product Manager
Designer	@ designer
Teach lead	@ lead
Technical writers	@ writers
QA	@ QA
Approved by	CTO

☀Introduction

This document describes the requirements for the MVP mobile application Subscriptions management app, which allows users to add and manage subscriptions, use integration with services, and provide data aggregation. The document will be used by development, testing, project management teams, and stakeholders as the primary source of authoritative information during development.

Project scope:

The system provides the following key features:

- Registration and login,
- User profile management,
- Manually adding and editing subscriptions,
- Cost aggregation,
- Subscription payment reminder,
- Automatic and manual deletion of subscriptions,
- Clear and intuitive interface,
- Support for different languages and currencies,
- Integration with subscription cancellation services.

					ЛР.ОК24.ПІ231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		30

Out of scope:

- Payment through the program,
- Integration with banks,
- Grouping subscriptions with other users.

Definitions, acronyms, abbreviations:

Acronym	Full Form	Description
SRS	Software Requirements Specification	A document that describes what a software system should do and how it should perform.
API	Application Programming Interface	A set of rules and tools that allows different software applications to communicate with each other.
Feature	Feature	A specific functional capability of the product that delivers value to the user.
User Story (US)	User Story	A short, simple description of a feature told from the perspective of the person who desires the new capability, usually a user or customer of the system.
Use Case Diagram	Use Case Diagram	A diagram that visually represents the interaction between users (actors) and the system.
Acceptance Criteria (AC)	Acceptance Criteria	The conditions that a software product must meet to be accepted by a user, a customer, or other stakeholders.
RACI-matrix	RACI Matrix	A responsibility assignment chart that maps out who is Responsible, Accountable, Consulted, and Informed for tasks and deliverables in a project.

General description

Subscription Management App is a B2C platform designed to simplify online subscriptions. Its main goal is to give users control over their spending, gather all subscription information in one place, and reduce unplanned expenses. The app interacts with the backend via REST API and integrates with services to automate processes.

Main product feature:

- Registration via email and SN
- Manual and auto subscription adding
- Manual and auto subscription deleting
- Subscription sorting, categorization and filtering
- Subscription data aggregation
- Notification of early payment

					JP.OK24.M231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		31

- Integration with subscription services

User characteristics:

- Users: phone users who want to keep all their subscriptions in one place and have full control over their subscription costs

Functional Requirements (User Stories + Acceptance Criteria)

US-01 - Registration

As a new user, I want to sign up with an email and password so that I can create a secure personal account.

- **AC-01** - Given I am on the registration page, when I enter a valid email address and a password that meets the security requirements, then my account is successfully created.
- **AC-02** - Given I try to register with an email address that already exists in the system, when I submit the form, then I see an error message "This email is already in use," and the account is not created.
- **AC-03** - Given I enter a password that does not meet the complexity criteria, when I submit the form, then I see a validation error and the account is not created.

US-02 - Log in

As an existing user, I want to log in with my email and password so that I can access my data.

- **AC-01** - Given I am a registered user on the login page, when I enter the correct email address and password, then I am successfully authenticated.
- **AC-02** - Given I am on the login page, when I enter an incorrect email or password, then I see an error message "Invalid credentials".

US-03 - Social networks login

As a registered user, I want to log in using social networks so that it's faster.

- **AC-01** - Given I am on the login page and social login is available, when I successfully authenticate through that network, then I am logged into the app.
- **AC-02** - Given I am a new user, when I log in via a social network for the first time, then an account is automatically created for me using data from the social network.
- **AC-03** - Given I attempt to log in via a social network, when the authentication with the third-party service fails, then I have an error message.

US-04 - Password change

As a user, I want to be able to change my password so that I can keep my account secure.

- **AC-01** - Given I am in account settings and chose to change password, when I entered the old password correctly and the new one twice then the password is changed.
- **AC-02** - Given I am trying to change my password, when I enter an incorrect current password, then I see an error message, and the password is not changed.
- **AC-03** - Given I am trying to change my password, when the new password and its confirmation do not match, then I see a error, and the password is not changed.

					JP.OK24.MI231.03.01	Арк.
						32
Змін.	Арк.	№ докум.	Підпис	Дата		

US-05 - Disable notification

As a user, I want to be able to turn off notifications so that they don't interfere.

- **AC-01** - Given I am in the notification settings section, when I turn off the notifications, I no longer receive push notifications.

US-06 - Manual subscription adding

As a user, I want to manually add a new subscription so that I can begin tracking its cost and payment dates.

- **AC-01** - Given I am on the "Add New Subscription", when I fill in all required fields and save, then the new subscription appears in my main list.
- **AC-02** - Given I am trying to save a new subscription, when I have not filled in a mandatory field, then I see error next to that field, and the subscription is not created.

US-07 - View Subscription List

As a user, I want to see a list of all my subscriptions on one screen so that I can have a complete overview of my recurring expenses.

- **AC-01** - Given I have added one or more subscriptions, when I open the main screen, then I see a list of all my active subscriptions.
- **AC-02** - Given I haven't added any subscriptions yet, when I'm on the main screen, I see the message "No active subscriptions"

US-08 - Edit Subscription

As a user, I want to be able to edit my subscription details, so that I can change something.

- **AC-01** - Given I am viewing the details of an existing subscription, when I make changes to the fields and save, then the subscription information is updated.
- **AC-02** - Given I am editing a subscription, when I enter invalid, then I see a error, and the changes are not saved.

US-09 - Manual Subscription deleting

As a user, I want to manual delete a subscription so that it no longer appears in my active expenses and financial forecasts after I've canceled it.

AC-01 - Given I am viewing my list of subscriptions, when I select the delete option for a specific subscription and confirm the action, then that subscription is removed from the apps.

US-10 - Subscription catagorization

As a user, I want to assign a category to my subscriptions so that I can better organize them.

- **AC-01** - Given I am adding or editing a subscription, when I select a category from the list, then the category is saved with the subscription.

US-11 - Subscription search

As user, I want to be able to search for a subscription by name so that I can quickly find.

- **AC-01** - search field, then the list show only subscriptions that match the query.

					ЛР.ОК24.ІІ231.03.01	Арк.
						33
Змін.	Арк.	№ докум.	Підпис	Дата		

- **AC-02** - Given Search is open, when a non-existent subscription is entered, the message "No such element found" is displayed.

US-12 - Filtering

As a user, I want to be able to filter subscriptions by category so that saves time.

- **AC-01** - Given I have subscriptions in different categories, when I apply a filter for some the category, then only subscriptions assigned to this category are displayed in the list.
- **AC-02** - Given I have subscriptions in different categories, when a category is selected that has no subscriptions then message "No such element found" is displayed.

US-13 - Sort subscription

As a user, I want to be able to sort subscriptions by specified parameters so that I can show the information I need.

- **AC-01** - Given I have subscriptions when I choose a sort criterion and order then my subscriptions are sorted by the specified conditions

US-14 - Monthly expense widget

As a user, I want to see a widget that displays my monthly expenses so that I can monitor my spending.

- **AC-01** - Given I have active subscriptions, when I open the analytics screen, then I see a widget displaying the total subscription expenses for the current month.
- **AC-02** - Given I have no subscriptions and never had any, when I open the analytics screen, then I see widget with empty values.
- **AC-03** - Given I don't have any active subscriptions but there were during this period, when I open the analytics screen, I see widgets with the values of past subscriptions.

US15 - Yearly expense widget

As a user, I want to see a widget that displays my yearly expenses so that I can monitor my spending.

- **AC-01** - Given I have active subscriptions, when I open the analytics screen, then I see a widget displaying the total subscription expenses for the current year.
- **AC-02** - Given I have no subscriptions and never had any, when I open the analytics screen, then I see widget with empty values.
- **AC-03** - Given I don't have any active subscriptions but there were during this period, when I open the analytics screen, I see widgets with the values of past subscriptions.

US-16 - Expance chart

As a user, I want to see a pie chart of monthly expenses so that I can better understand.

- **AC-01** - Given I have subscriptions assigned to categories, when I view the analytics screen, then I see a pie chart visualizing the breakdown of my monthly expenses by category.
- **AC-02** - Given I have no information about subscriptions for this month ,when I open the analysis screen, then I see a blank chart

US-17 - Paymant calendar

					ЛР.ОК24.ПІ231.03.01	Арк.
						34
Змін.	Арк.	№ докум.	Підпис	Дата		

As a user, I want to see the payment calendar so that it is a convenient.

- **AC-01** - Given I have scheduled subscription payments, when I open the payment calendar, then I see the dates on which payments are scheduled marked on the calendar.
- **AC-02** - Given I am on the payment calendar, when I tap on a marked date, then I see a list of subscriptions due for payment on that day.
- **AC-03** - Given I have no scheduled payments, when I open the payment calendar, then it is empty.

US-18 - Payment history

As a user, I want to be able to view my subscription history so that I can track my subscription costs.

- **AC-01** - Given I have a subscription with past payments, when I open the details of this subscription, then I see a "Payment History" list of past payments.

US-19 - Export report to email

As a user, I want to receive a statement of expenses to my email address so that I can show others.

- **AC-01** - Given I am on the analytics screen, when I select the "Export monthly report" option and, then I receive an email with a file containing the expense report.

US-20 - Set reminder period

As a user, I want to set a reminder period to keep track of time.

- **AC-01** - Given the reminders tab is open and reminders are enabled, when a period is selected from the list and confirmed, then the setting is applied.

US-21 - Receive payment notification

As a user, I want to receive payment notifications so I don't forget about my subscriptions.

- **AC-01** - Given a reminder period set, when the time comes then a notification comes.
- **AC-02** - Given no reminder period set, when the subscription is about to end, then the notification does not arrive.

US-22 - Choose notification servise

As a user, I want to be able to choose which services I receive notifications from so that I don't miss any messages.

- **AC-01**- Given the reminder tab is open, when a service for sending messages is selected and saved, then a message will arrive using this service

US-23 - Automatic subscription cancellation

As a user, I want to set the subscription to auto-unsubscribe so that I no longer need it.

- **AC-01** - Given the card is integrated with the service, when the automatic subscription cancellation option is selected, then the subscription will be canceled at the end of the subscription period.

					ЛР.ОК24.ПІ231.03.01	Арк.
						35
Змін.	Арк.	№ докум.	Підпис	Дата		

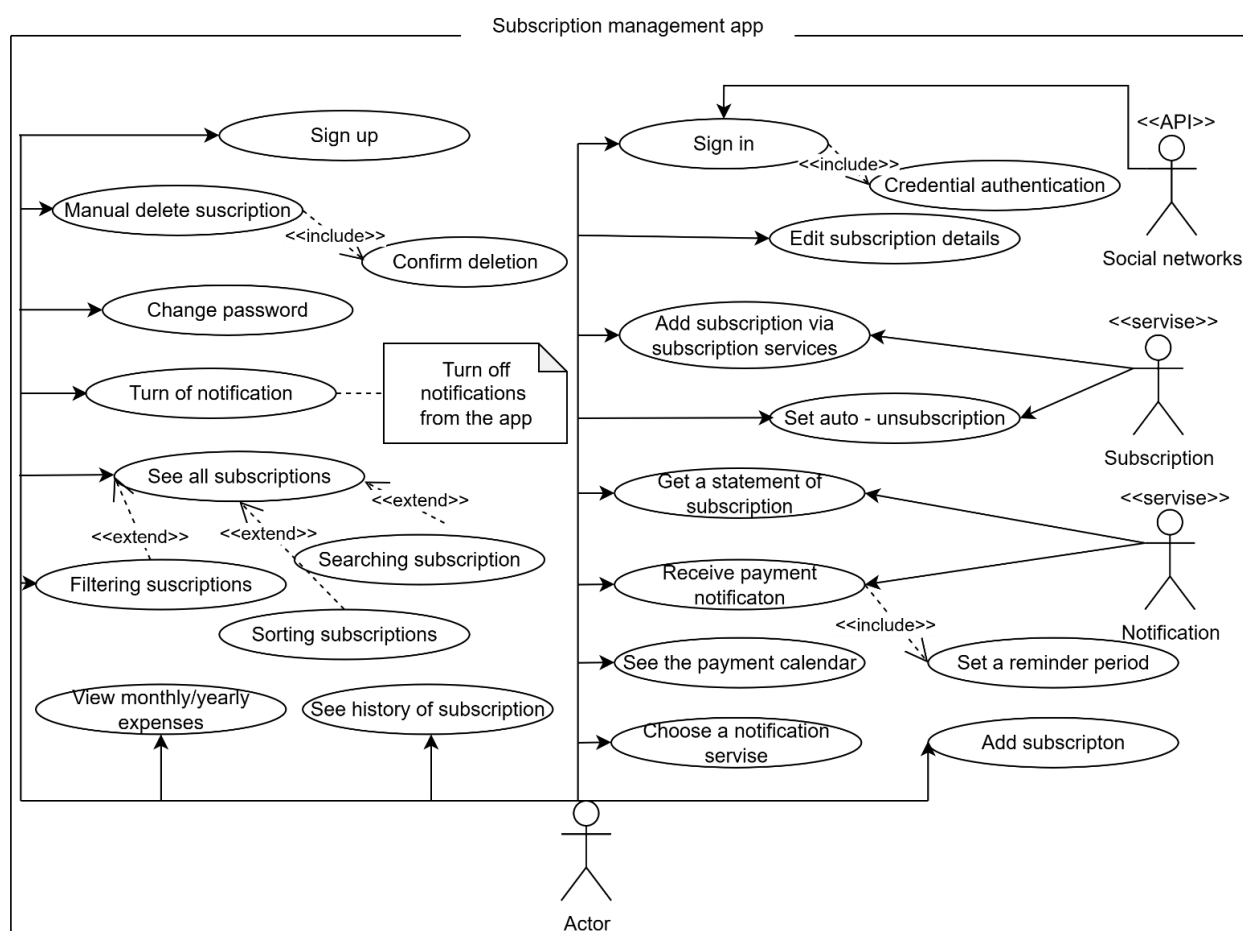

- **AC-02** - Given the card is not integrated with the service, when a subscription is opened then there is no automatic cancellation option

US-24 - Add subscription via integration

As a user, I want to add a subscription using integration with services so that it is faster.

- **AC-01** - Given I have connected my account , when I initiate a subscription scan, then the app finds my active subscriptions from that service and suggests adding them to my list.
- **AC-02** - Given a subscription was found automatically, when I confirm adding it, then it appears in my list with its pre-filled.

Use case diagram

RACI Matrix for Subscriptions management app major features:

- R – Responsible → the role that actually does the task.
- A – Accountable → the role ultimately answerable for the task.
- C – Consulted → the role(s) providing input.
- I – Informed → the role(s) kept up to date.

Feature / Action	End User	Product Owner (PO)	Project Manager (PM)	Development Team (Dev Team)	QA Engineer
Registration and Authentication	C	A	R	R	C

Exporting reports	C	A	R	R	C
Notification settings	C	A	R	R	C
Receiving reminders	C	A	R	R	C
Feature requirements definition	R	A	C	C	R
Deployment and releases	R	R	R	R	R
Testing and quality assurance	I	A	R	R	I

Feedback collection and analysis	R	R	C	I	R
----------------------------------	---	---	---	---	---

Non - Function Requirements (NFR)

Performance

- Main screen loading time must be less three seconds
- The system should be able to support multiple users simultaneously
- Performance degradation with large number of subscriptions
- The program has the advantage of being easy to maintain and support

Scalability

- The system must be able to scale to accommodate a large number of users

Availability and reliability

- The system must be available 99% of the time
- The system must support a large number of users
- Fast integration process with services

Usability

- The interface should be clear and intuitive
- Performing actions in a few clicks

Security

- Using avorization
- Data encryption

Compatibility

- Android 15 and IOS 18 compatibility

Interface Requirements

User Interfaces (UI)

- Responsiveness: The user interface should adapt to different screen sizes
- Intuitiveness: The interface should be clear and intuitive
- Multilingualism: There should be support for foreign languages and different currencies
- Push notifications: The system should send push notifications about the need for payment

Softavre Interfaces

- Distribution platforms: The application must be available in the AppStore and PlayMarket
- Operating systems: The system must run on IOS 18 and Android 15

					JP.OK24.II231.03.01	Арк.
						38
Змін.	Арк.	№ докум.	Підпис	Дата		

- Database: The system should use PostgreSQL 17 to store data
- Social authentication: Log in using a social network
- Integration with services: The system should integrate with subscription services to add and automatically cancel subscriptions.

Communication Interfaces

- Integration with subscription services and social networks via their APIs, which requires the use of HTTPS and JSON

Technical Requirements

Technical stack

- Backend: Node.js 20 LTC with NestJS 11.x framework
- Frontend: React.js 18.x with TypeScript 5,9.x
- Database: PostgreSQL 17

Architecture

- The theme should be developed on a microservices architecture

Environment Requirements

- The program must be available in the AppStore and PlayMarket
- The application should be available for Android 15 and IOS 18 versions

Constraints and risks

Constraints are conditions that must be followed and cannot be changed during development.

Budgetary Constraints - The total development cost shall not exceed the allocated project budget of \$X.

Time Constraints - The system must be delivered and deployed by [specific deadline].

Regulatory and legal restrictions - The system must not violate data protection law, and AppStore and PlayMarket rules

Resource Constraints - The development team is limited to 7 full-time engineers and 1 QA specialist.

Risks

Risk ID	Description	Likelihood	Impact	Mitigation Strategy

R1	Problems accessing third-party APIs	Medium	Hight	Implement logic for re-requests and viewing the status of services
R2	Low user attention level	Medium	Hight	Conduct market research, collect feedback and implement unique solutions
R3	Development problems due to difficulty integrating with other services	Medium	Medium	Conduct a detailed assessment and plan for integration with services
R4	Problems with scaling support	Medium	Medium	Strive to work with a scalable microservices architecture

Testing

Test Objectives

- Verify that all functional requirements are implemented correctly
- Validation of all non-functional requirements
- Early detection of all defects
- Ensure that the system is stable

Testing Types

The following types of testing shall be performed:

Test type	Description
Unit testing	Testing individual modules to verify correct operation
Integration testing	Checking the interaction between microservices, as well as external services
System testing	Testing the entire program
Acceptance testing	Testing by the Product Owner to confirm that the system meets user requirements
Usability testing	Evaluation of whether the interface is clear and intuitive

Test Enviroment

- All tests shall be performed in a dedicated staging environment that mirrors production.
- Test data shall be anonymized and comply with data privacy regulations.
- The environment shall include all required software, hardware, and network configurations.

					JP.OK24.Π231.03.01	Арк.
Змін.	Арк.	№ докум.	Підпис	Дата		40

Test Tools:

- Unit Testing: Jest / JUnit / NUnit
- Integration and System Testing: Postman, Selenium
- CI/CD Integration: GitHub Actions, Jenkins

test Plan Overview

Item	Description
Test Scope	All functional and non-functional requirements described in the SRS
Test Objectives	Verify compliance with requirements, find defects early, ensure quality
Test Schedule	ligned with the development milestones
Entry Criteria	All planned features for the sprint are implemented and build is stable
Exit Criteria	100% of test cases executed, 95% passed, 0 critical defects open
Responsible Roles	QA Engineers, Developers (for unit tests), Product Owner (for acceptance)

Appendices

Metric	Category	Description	Target Value	Measurement Method	Responsible
Requirement Coverage	Functional	Percentage of implemented functional requirements	100%	Requirements Traceability Matrix	Product Owner/QA
Defect Rate	Quality	Number of defects at the release stage	<1	Bug tracking reports	QA
Response Time	Productivity	Home screen loading time	3 seconds	Performance testing tools	QA
System Uptime	Productivity	System availability percentage	99%	Monitoring tools	PM/ dev. team

Task Completion Rate	User experience	Percentage of users who completed all tasks	>95%	Usability-test	QA/PO
Business Value	Business	Level of achievement of business goals	Max feedback	User survey	PO

Milestones

Milestone	Target Date	Description	Owner
M1 – MVP Release	Q4 2025	Core Features: Account registration/login, manual addition, viewing, editing, and deletion of subscriptions. This lays the groundwork for the application's basic functionality	Dev. team, QA, PO
M2 – Analytics & Notifications	Q4 2025	Enhancements and Analytics: Login via social networks, categorization and search for subscriptions, expense tracking widgets, viewing payment history, and setting up payment reminders	Dev. team, QA, PO
M3 – Advanced Features	Q1 2026	Advanced Functionality: The ability to disable notifications, filter and sort subscriptions, visualize expenses with charts, a payment calendar, and automatic cancellation of integrated subscriptions	Dev. team
M4 – Automation and Integration	Q2 2026	Automation and Integrations: Exporting expense reports to email and automatically adding subscriptions through service integration, which are the most complex elements	Dev. team

Open questions

Question	Answer	Date Answered
What are the specific password complexity requirements?	- Pending-	-

What specific languages and currencies will the program have?	- Pending-	-
What specific networks will be available for login?	- Pending-	-
What specific services can provide APIs for integration?	- Pending-	-
